

# USPI Cardiology Program

Physician Driven • High Quality, Efficient Setting • Patient Centered

## About USPI

Since 1998, United Surgical Partners International has been an industry leader in the ambulatory surgery center and surgical hospital business. USPI has over 200 ASCs and 17 surgical hospitals in 26 states across the country. As we approach the landmark of serving one million patients annually, we maintain our commitment to our physician partnerships and the critical alignment that allows us to collectively deliver the highest quality care with outstanding service to our patients.

*USPI's core mission is: "To provide first-class surgical services for the local community in a safe, comfortable and welcoming environment, one in which we would be happy to treat our own families."*

USPI's Cardiology Program is designed to offer patients a safe, reliable, and cost effective solution for procedures while offering physicians increased autonomy and efficiencies with high quality standards. In addition, the Cardiology Program offers physicians potential for additional revenue while meeting emerging market demands by patients. Many CRM surgeries are shifting to the outpatient setting and the ASC experience offers a good fit for patients who are looking for a quality, time, and money saving surgical option.

## Cardiology Program Benefits

### Physician Driven

Expanded options for physician preference items, including devices

### Improved Coordination of Patient Care

Commitment to Superior Outcomes with Rigorous Measurements and Tracking

### Continuous Performance Improvement

### Increased Patient Satisfaction

### Collaborative Team Work

### Ownership Opportunities

## The Opportunity

### Clinical Advancements

Advances in clinical protocols and technology continue to shift procedures from the inpatient to outpatient setting and provide for opportunities to perform cardiovascular procedures in ASCs.

### Market Growth

According to a recent Becker's Hospital Review report, outpatient cardiovascular services are expected to grow by nearly 20% over the next few years. Patients looking for less wait time, more convenience and lower cost options will naturally gravitate to the outpatients setting for increased patient satisfaction.

### Physician Involvement

By utilizing a comprehensive approach that couples physician leadership with USPI's ASC industry experience, we can accomplish:

- Cardiology procedures in a lower cost setting
- Improved patient care
- Provide additional revenue opportunities for Cardiologists
